CAREER OBJECTIVE

Motivated MCA graduate with hands-on experience in building full-stack web applications using React.js, Django, and REST APIs. Skilled in developing responsive user interfaces, backend services, and database-driven systems. Seeking an entry-level developer role where I can contribute to real-world projects, continuously improve my technical skills, and grow as a full-stack developer.

EDUCATION

Master Of Computer Applications	2023 – 2025
BV Raju College (Bhimavaram)	CGPA -7.6/10

TECHNICAL SKILLS

- | | |
|---------------------------------|--|
| • Programming languages: | Python |
| • Data Base: | MySQL |
| • Frontend: | HTML, CSS , JavaScript, React.js |
| • Backend: | Django, Django REST Framework (DRF), REST APIs |
| • Version Control: | Git, GitHub, VS Code, Postman |

PROJECTS

E-Commerce Web Application | React.js

- Developed a single-page e-commerce web application using React.js with functional components and React Hooks (useState, useEffect).
- Implemented client-side routing using React Router DOM for Home, Product Details, and Cart pages.
- Integrated REST APIs using Axios to fetch and display product listings, search results, and category-based filtering from DummyJSON.
- Built a complete shopping cart system with add to cart, quantity increment/decrement, remove item functionality, and dynamic cart badge count.
- Managed application state using React Hooks and implemented persistent cart storage using localStorage.
- Live Demo: <https://simple-mart-react-project.vercel.app/>

Bus Seat Booking System (Full Stack)

- **Tech Stack:** React.js, JavaScript, Django, Django REST Framework, Axios, React Router, HTML, CSS, Git.
- Built a full-stack Bus Seat Booking web application using React.js (frontend) and Django REST Framework (backend) to manage buses, seats, and bookings.
- Developed REST APIs for bus details, seat availability, and booking operations with secure Token Authentication.
- Implemented dynamic seat selection UI with real-time booking status using React Hooks, Axios, and React Router.
- Designed relational database models for buses, seats, and users using Django ORM with MySQL database.
- Added login-based seat booking flow and payment simulation module to mimic real booking workflow.
- Integrated frontend and backend with API calls and deployed the project using modern hosting platforms.
- Live Demo: <https://fullstack-project-frontend-eight.vercel.app/>

CERTIFICATES

- Basics of python by Infosys Springboard.
- Introduction to data science by cisco networking academy.
- Artificial intelligence fundamentals by IBM SkillsBuild.

SOFT SKILLS

- Team work
- Problem-solving
- Time management
- Communication skills.
